Adding a member's children

A child who dives or snorkels with a parent doesn't need a sign-in of their own. Put them under the parent, and the parent can book dives and kit for them.

Where

Members admin → **Committee & members**, on the parent's row of the roster.

What the parent sees

The child appears under **People you keep kit for** in their Kit Bag, an **Add** button appears on dives they've booked, and kit requests ask who it's for (guide M7).

Adding a child

1. **Press + books for**
   On the parent's row, press **+ books for**.
2. **Type the child's name**
   Just a name. Press **Add them**. The child's name then sits under the parent on the roster, with a **×** to remove it.

1 the child's name, 2 Add them.

Children's prices

If the club charges less for children, set it under **What the club charges** on the Kit store tab (guide K6).

Two adults in one house

That's a household, not a child: see guide MS3.
