# Packs, prices and who can take what

Sell a whole set at one price, set what the club charges, and stop items going to people without the right grade.

**Where**

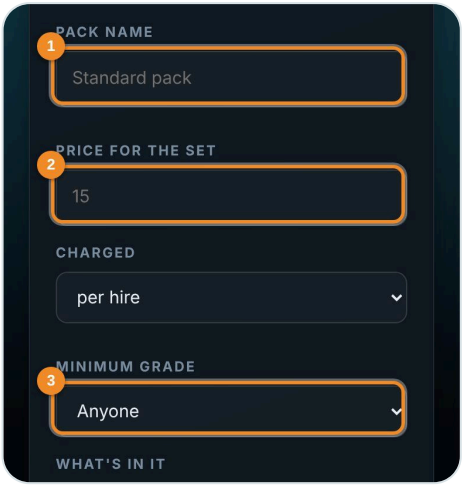

**Members admin → Kit store**: **Packs**, **Who can take what out** and **What the club charges**. Each item's own price is behind its **Price** button.

**Optional**

A club that doesn't charge, or has no grade rules, can leave these alone.

## Packs

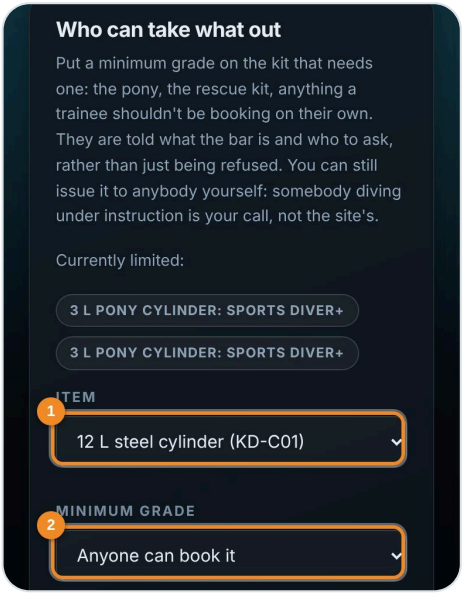

1. **Make a pack**
   Give it a name ("Standard pack"), a price for the set, per hire or per day, the lowest grade allowed if any, and tick what's in it: **any cylinder**, **any regulator** and so on, or particular items. Press **Add pack**. Members then press **Ask for this set** and get whatever is free.

1 pack name, 2 price for the set, 3 minimum grade.

## Who can take what out

1. **Set a minimum grade**
   Pick an item and the lowest grade allowed, and press **Set**. Members below it see **Not for your grade** and who to ask, instead of being refused at the end.

1 item, 2 lowest grade, 3 Set.

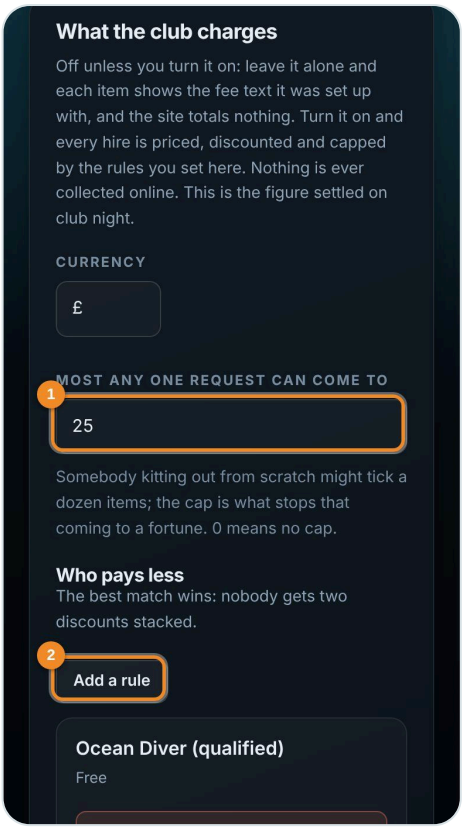

## What the club charges

1. **Start charging**

   Set the currency, the most any one request can come to, and under **Who pays less** add rules: a grade (trainees), children, and how much off. Press **Save**. The site then works out each request's cost. **Stop charging** switches it all off.

2. **Each item's price**

   Press **Price** on an item: the amount, and whether it's per hire, per day or per fill.

1 the cap, 2 Add a rule, 3 Save.
