Your home screen

What the tiles on the home screen mean, what the panel behind your initials does, and the cards that show you what's new on the site.

Where

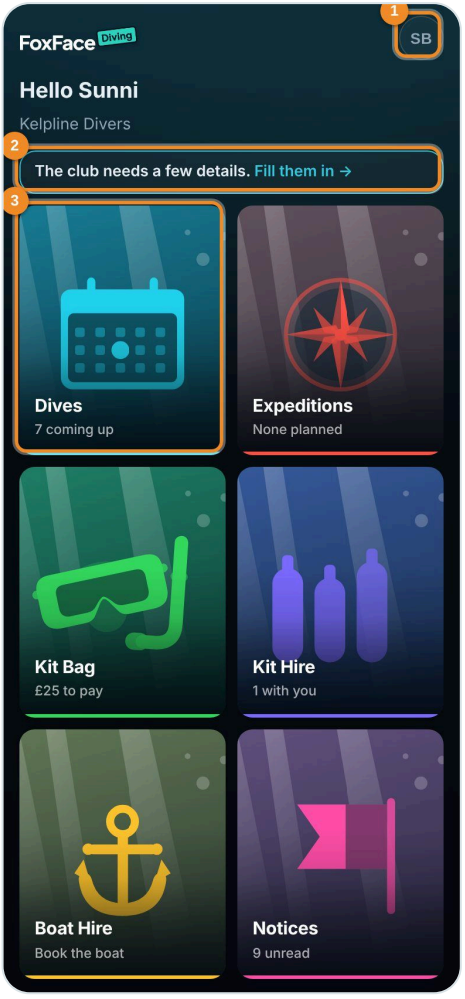

The first screen after you sign in. Every other page has **Home** in its menu to get back here.

It keeps itself up to date

The numbers on the tiles (dives coming up, kit waiting, unread notices) are refreshed each time you come back to the screen.

The tiles

1. **Dives**
   The dive calendar: how many dives, trips and sessions are coming up (guide M3).
2. **Expeditions**
   The bigger trips being planned, from the noticeboard.
3. **Kit Bag**
   Your details and your own kit list. It says **Details needed** while the club is waiting for something from you, and shows anything you owe.
4. **Kit Hire, Boat Hire, Notices**
   The club's kit store (guide M4), the club boat (guide M5) and the noticeboard (guide M8), with how many of your requests are waiting and how many notices you haven't read.
5. **The club needs a few details**
   A line above the tiles when something is outstanding. **Fill them in** takes you straight there.

1 your initials, 2 something outstanding, 3 the tiles.

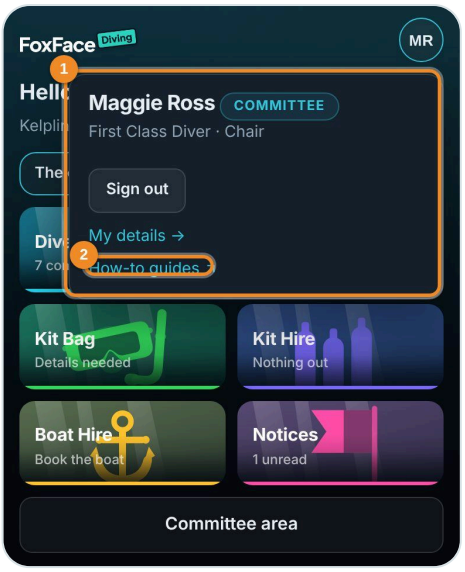

The panel behind your initials

1 **Tap your initials, top right**

Your name and grade, **Sign out** (guide M1), a link to **My details**, and the **How-to guides**. In the phone app there's also **Switch club**, for anyone in more than one club.

2 **Committee area**

If you hold a committee post, a **Committee area** button sits under the tiles. Nobody else sees it.

1 the panel, 2 the How-to guides.

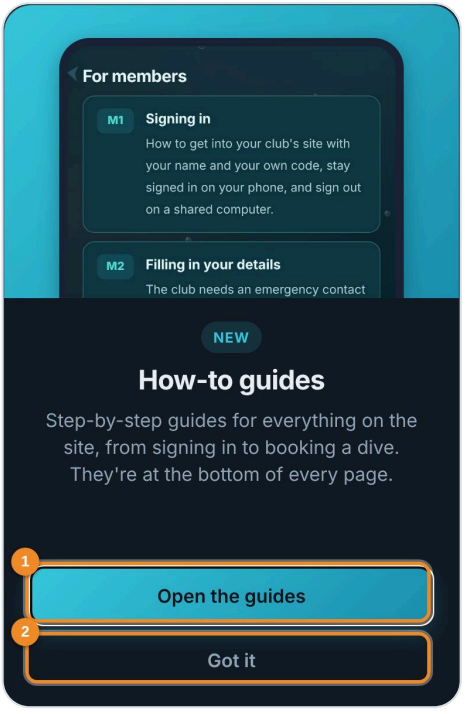

What's new

1 **A card the first time something is added**

When the site gains a new feature, you see one card about it the next time you sign in, with a picture of the real thing and a button straight to it. Press the button to go and look, or **Got it** to carry on.

2 **Once only**

The site remembers you've seen it, so it won't come back on your other phone or computer.

1 go and look, 2 Got it.

FoxFace Diving how-to guides, guide M12. Pictures are from Kelpline Divers, a made-up club; your club's site shows your own names and kit. Made by FoxFace. Version 2, October 2026.
