Households

Link members who live together, so one can book for the other. Who may act for whom is each member's own choice.

Where

Members admin → **Membership**, under **Households**.

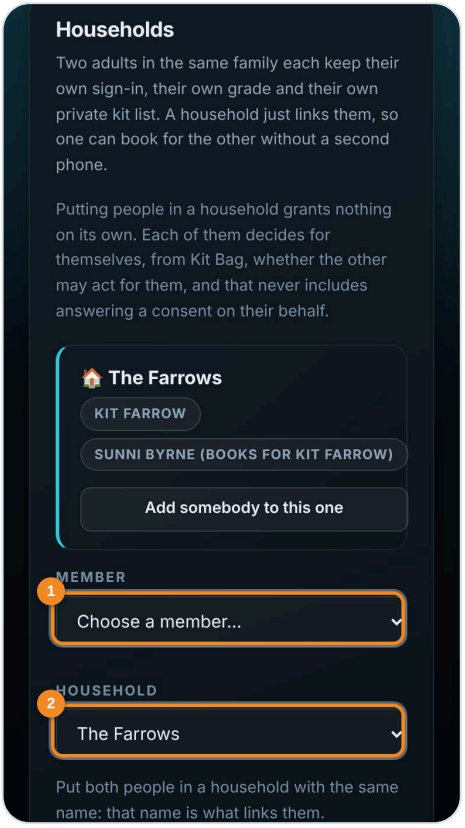

Grants nothing on its own

Each member decides for themselves, from Kit Bag, whether the other may act for them (guide M15). Nobody can answer a consent for someone else.

Linking people

1. **Put them in a household**
   Choose the member, then **A new household…** and what to call it, or an existing one. Press **Put them in it**. Put each person in a household with the same name: that name is what links them.

2. **Taking someone out**
   Choose them and press **Take them out**. Leaving a household takes any permission with it.

1 member, 2 household, 3 Put them in it, 4 Take them out.

A child

A child doesn't need a sign-in or a household: add them under the parent with **+ books for** on the roster (guide C17).
